

AMENDMENTS TO THE CLAIMS

Please **AMEND** claims 20-23 as shown below.

The following is a complete list of all claims in this application.

1-19. (Cancelled)

20. (Currently Amended) A liquid crystal display (LCD) having a transmissive region and a reflective region, the LCD comprising:

a substrate;

a thin film transistor (TFT) formed on the substrate and comprising a gate electrode, a source electrode and a drain electrode;

a first pixel electrode formed ~~of the same material and~~ on the same plane with the gate electrode, the first pixel electrode comprising:

a transparent conductive layer; and

a non-oxidizing metal layer formed on the transparent conductive layer and having a first opening corresponding to the transmissive region;

a passivation layer formed on the TFT and the first pixel electrode and having a contact hole exposing the source electrode and a second opening corresponding to the transmissive region; and

a second pixel electrode formed on the passivation layer and connected to the non-oxidizing metal layer and the source electrode via the second opening and the

contact hole, respectively, the second opening having a third opening corresponding to the transmissive region.

21. (Currently Amended) The LCD of claim 20, wherein the non-oxidizing metal layer ~~comprises~~ is formed of Cr or MoW.

22. (Currently Amended) The LCD of claim 20, wherein the transparent conductive layer ~~comprises~~ is formed of indium tin oxide (ITO) or indium zinc oxide (IZO).

23. (Currently Amended) The LCD of claim 20, wherein the passivation layer ~~comprises~~ is formed of a photosensitive transparent insulating material.

24. (Previously Presented) The LCD of claim 23, wherein the passivation layer has embossment on a surface thereof.
